IV. First Aid Measures

Inhalation
Remove victim from exposure. If difficulty with breathing, administer oxygen and seek medical assistance.

Eyes
Flush eyes with cold water for a minimum of 15 minutes, lifting lower and upper eye lids throughout. Seek immediate medical attention.

Skin
Immediately remove contaminated clothing. Wash thoroughly with soap and water. If irritation persists seek medical attention. Wash contaminated clothing before reuse.

Ingestion
Do not induce vomiting, get immediate medical attention, if vomiting occurs spontaneously keep head below hips to prevent aspiration of liquids into lungs. Do not give anything by mouth to an unconscious person.

V. Fire Fighting Methods

HMIS Hazard Rating No. 1

**Flash Point:** 169 °F (76.1 °C)  
**Method:** Tag C.C.
**General Hazard:** Decomposition and combustion products may be toxic.
**Auto-Ignition Temp.:** Not Available

**Limits of Flammability**
- LEL: Not Available
- UEL: Not Available

**Extinguishing Media**
Use foam, Carbon dioxide, or dry chemical.

**Special Fire & Unusual Hazards**
Move containers from area if it can be done without risk. Cool fire-exposed containers with water from the side. As in any fire, wear NIOSH/MSHA approved; pressure demand self-contained breathing apparatus and full protective gear.

VI. Accidental Release Measures

**Action To Take For Spills/ Leaks:** Avoid contact with skin or eyes. Ventilate area, and eliminate all sources of ignition. Wear appropriate protective gear, contain leak or spill, salvage, clean up residue with absorbent material.

**Waste Disposal Method:** Handle disposal of waste material in manner that complies with local, state, province and federal regulation. Landfill if solidified, or incineration at agency approved waste-disposal facilities.

Reference to other sections:
See Section VII for information on safe handling
See Section VIII for information on personal protection equipment
See Section XIII for disposal information
VII. Handling And Storage

Storage: Store in a cool dry place at 50-95°F
Condition material to 65-85° F before using

VIII. Exposure Controls / Personal Protection

Ventilation: Ventilation is recommended. Air movement must be designed to insure turnover at all locations in work area to avoid build up of heavy vapors.

Personal Protection Equipment: Do NOT wear contact lenses when working with this material. Use chemical goggles/safety glasses with side shields and impervious gloves. Wear clothing with long sleeves and pants. In operations where mists can be generated or the exposure limits for crystalline silica exceeded, wear a NIOSH/MSHA approved dust/fume respirator selected by a technically qualified person for the specific work conditions. Wear respirator protection whenever airborne concentrations exceed TLV ceilings or TWA, use NIOSH approved respirators for listed hazard.
Confined spaces, room, or tanks are areas where concern for TLV’s is especially important. Reference OSHA regulation CFR 29 1910.134 for recommended respiratory protection.
